

# Lamp

Zichy Collection

Accession Nr.: 9439 

Type: archaeological artifacts

Date of production: 1st–4th c. A.D.

Materials/Technique  
s: clay

Dimensions: height: 2 cm  
diameter: 4.5 cm  
length: 6.5 cm

An intact, reddish-brown lamp with one nozzle. There is a decoration of rosettes around its discus. Its filling hole is relatively small, and there are traces of use around its wick hole.

Another pottery lamp but in different form: 9438

These lamps were very popular all over the Roman Empire, and their presence in Roman provincial context is regarded as indication of Romanization.
